CLAIMS 1-10 AND 13-45 ARE PRESENTED FOR
EXAMINATION

Further restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 2, 5 and 9, drawn to non-estrogenic compounds to treat bone;
- II. Claims 3 and 4, drawn to estrogen compounds to treat bone;
- III. Claim 6, drawn to a non-androgen compound to treat bone;
- IV. Claims 7 and 10, drawn to androgens to treat bone;
- V. Claims 13-29 drawn to compounds with at least two (2) rings, with a phenol on the second ring, to treat bone;

Claims 1, 30 - 37 will be examined with Group I

Claims 5, 8 and 38-45 will be examined with Group III.

Further restriction may be required.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I-V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have acquired a separate status in the pharmaceutical art since the claims traverse an astronomical number of compounds and would be an undue burden on the examiner. It is to be noted that the claims are drawn to androgens, estrogens, non-androgens and non-estrogen compounds, etc.

Each of these groups of compounds have various subclassification in Class 514.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
